## ATEX Solutions

### Automatic scales according to ATEX directive

Automatic scales of types, which not belong to this model series but require a certification for category 1, will be tested individually according to annex IX of the directive 94/9/EEC. Precondition is a realizable technical solution for the desired application.

In category 1 only a few ignition protection types are permitted. Here our competencies and our knowledge are required.

For automatic scales out of category 1 many ignition protection types are allowed and it is easier to find a technical solution.

We would like to offer you our expertise in the area of automatic scales intended for the use in potentially explosive atmospheres.

Big Bag filling device for organic powders in DOW Olefinverbund GmbH Schkopau. This weighing machine was individually tested according to annex IX of the directive 94/9/EEC
